CET TIME	4 November			
8:45-9:00	**Presidential Address and information**			
9:00 -10:00	**Keynote Talk** **Michael Kirchhoff** (University of Wollongong) *Physical Computation - The Computational Fallacy for Brains & Computers*			
10:00 - 10:05	**Break**			
10:05-12:05	**Room I - Language** **Alexandra Ioana Din** - Code-switching as narrative resource in bilingual Romanian-German children **Monicka Sre R V** - Beyond the Printed Word: The Hidden Acoustics of Reading and Language Learning **Huang Lei** - Where Does the Competence Reside? Interaction-Dependent Functional Emergence in a Two-Model Language System **Lotem Elber-Dorozko, Galit Agmon, & Omri Abend** - What is linguistic capacity? Lessons from LLM evaluations	**Room II - Symposium: Spontaneous Sense-Making Across Inner Speech, Mind Wandering and Dreaming** **Daniel Mueller** - Inner Speech & Creativity Pangelonium in the Brain—A Sociology of the Default Mode Network **Yizhi Li** - How Our Tales Spin Us: Spontaneous Thought and the Formation of the Narrative Self **Mengting Zhang** - Mind Wandering is Not Subject to Cognitive Control **Gaia Mizzon** - What Dreaming Teaches	**Room III - Perception** **Julieta Zapata** - One Predictive Architecture, Different Experiences: What Distinguishes Perception from Emotion? **Sreenish S** - Cognitive Penetrability of Perception and the Phenomenological Vulnerability of Naive Realism ~~**Niccolò Nanni** - Pluralism About Multisensory Objects~~ ~~**Christos Kalpakidis** - Transparency, Direct Realism, and the Minimal Self: Insights from Existential Phenomenology~~	**Room IV - Neural Mecanisms** **[Ends 12:35]** **Michał Piekarski** - Precision-Weighted Noise: A Hierarchical Predictive-Processing Account of the Conjunction Fallacy **Filippo Murabito** - Mechanistic Similarity across Biological Systems **Daniel De Luca-Noronha** - A Critique of the Conception of Pain as a Homeostatic Feeling **Jacopo Collelli -** Understanding inhibitory capacities: from task-based neuronal activations to functional decomposition **Nir Fresco & Marc Artiga** - Why concrete computation needs a physical home
12:05 - 13:00	**Break**			
13:00 - 15:00	**Room I Symposium: The Phenomenal Space of Wakefulness & Dreaming** **Merlin Herrick** - A multidimensional account of wakefulness **Simone Anthes** - What we talk about when we talk about dreaming **Ema Demšar** - The Phenomenal Space of Wakefulness & Dreaming **Melanie Rosen -** Self-consciousness in vicarious dreams	**Room II - Social minds** **Antonella Tramacere** - The limits of embodied approaches to comparative cognition **Emilio Leone** - Shared Embodied Time **Markus Eronen** - On worms, mirror neurons and explaining human behavior **Juan Diego Bogotá** - Can Social Interaction Constitute the Minimal Self?	**Room III - The Science of embodied cognitive science** **Mark-Oliver Casper** - Re-valuating linearity in 4E research **Matej Kohar** - Towards an affordance-based framework for intelligence **Mauro Lenti** - A Semi-deflationary account for the Sense of body ownership **Dan Durso** - Thinking About Affordances: A New Mechanical Account	**ROOM IV - Analytic approaches to the mind** **Marco Fenici** - Talking Minds into Being: A Socio-Pragmatic Alternative to Theory of Mind Acquisition **Rachele Cavarsaschi** - Perception of absences: an emblematic case **Benjamin Claessens** - Desires, Priors, and Purposes **Mariela Destefano** - Does Repeated Interaction with AI Foster Domain-Specific Cognitive Competence?

15:00 - 15:30	**Break**				
15:30 - 17:30	**Room I- Percpetion beyond vision** **[Ends at 18:00]** **Andrei Kochenkov** - Objectification Without Constancy: The Case of Olfaction **Benjamin D. Young** - How Didn't You Notice It: are Human Social Chemosignals Unconscious or Unattended? **Felipe Carvalho** - Perception & Coordination: reconceptualizing emotion perception through John Dewey **Varun Ravikumar** - The social scaling challenge for ecological psychology **Matthew Owen** - Can Human Cerebral Organoids Become Conscious? A Hylomorphic Perspective	**Room II- A new take on consciousness** **[begins at 15:00]** **Bintong Wang** - untitled **Bongrae Seok** - Neuroscience and Game Theory of Mindfulness Meditation: Embodied Moral Psychology of Buddhism **Matthew Lenzdiaz** - Illusory Conceivability and Perspicuous Arrangements **Savvas Ioannou** - Defining the Physical: Via Negativa and Non-Mental Descriptions ~~**Filipp Matveev** - Physicalism Naturalized~~	**Room III - AI & LLMs** **[starts at 15:00, ends at 18:00]** **Alisson Brandemarte Moreira** - On causally explaining depressive perception with paraconsistent neural networks **Brenda Bayles** - The Geometry of Reorganization Across Cognitive and Natural Systems **Fernanda Caroliny Cardoso** - If computers can think, why are LLMs not thinking? **Kristina Šekrst & Barbara Geld** - Lost in Transformers: Natural Language Autoencoders and the Limits of Machine Introspection **Matthew Watts** - AI, Epistemic Relations, and Testimonial Outsourcing **Éloïse Boisseau** - On Buckner and Millière's accusation of a 'redescription fallacy'	**Room IV - The Philsophy of (neuro) scientific practice** **[starts at 15:00]** **Paula Muhr** - From Local Lesions to Dynamic Distributed Networks Framing Brain Dysfunction in Neuroimaging Research on Functional Neurological Disorder **Caitlin Mace** - Is Vehicle Indeterminacy Radical? **Vaggelis Spathis** - Perceptual Recognition and The Limits of Naïve Realism **Antonio Monaco** - CAUSAL DISCOVERY STRATEGIES FOR COMPLEX COGNITIVE SYSTEMS **Urte Laukaityte** - The Role of History and Philosophy of Science in Medicine: Ontology, Epistemology, and Illness	
17:30 - 18:05	**Break**				
18:05 - 19:05	**Keynote Talk** **Louise Barrett** (University of Lethbridge) *A Report from an Academy: Why Psychological Concepts are not Species-Neutral*				

	5 November				
9:00 - 11:00	**Room I - 4E cognition** **Daniel Sherman** - Embodied Insights: Interoception in Psychedelic Epistemology **Marco DeGano** - Two Integration Problems for Mesh: the Vertical and the Horizontal Integration Problems. **Muzaffar Abass Wazir** - Establishing the uniqueness of extended mind thesis in the space of 4E cognition **Ting Guo** - When Does an Explicit "I" Emerge? Drowsiness, Action Conflict, and EmbodiedSelf-Representation	**Room II - Analytic Philosophy of mind** **Catalin Teoharie** - Direct Input Variables: Rethinking the Limits of the Extended Mind Hypothesis within Predictive Processing **Raffaele Giovanni Caravella** - Pain, Dispositions, and the Problem of Parts **Elena Ostos** - Generic memories in nonhuman animals **Jonida Kodra** - Control and Sense of Agency in Auditory Verbal Hallucinations	**Room III - (Neuro)philosophy of (neuro) science** **Camila von Holdefer Kehl** - The Cause That Remains: Dorothy Emmet and the Limits of Mechanism in the Sciences of Mind **Tomas Marvan & Wojciech Mamak** - Brain Currency and the Two-Point Neuron Architectures **Andrew Richmond** - From neuroscience to explainable AI: Representation, understanding, and explanation		
11:00 - 11:30	**Break**				
11:30-12:30	**Keynote Talk** **Yukie Nagai** (University of Tokio) *Making the Invisible Mind Visible: Generative Models for Understanding Human Cognition*				
12:30-12:45	**Break**				
12:45 - 14:45	**Room I - Instruments, meausers and markers in the mind sciences** **[starts at 12:30, ends at 15:00]** **Andrej Kutarna** - The Instrument Cannot See It: Bivalent Measurement and Trivalent Competence **Tom McClelland** - The Validation Problem for Markers of AI Consciousness ~~**Mitchell Herschbach** - Are There Objective Measures of "Theory of Mind" Abilities? Implications for the Study of Autism~~ **Katarzyna Zyń** - Moral Granularity as an Unrecognised Confound in Folk Metaethics. A Methodological Proposal **Suchismita Ghoshal** - Can the Sacred Be Measured? Neurophenomenology, Neurotheology, and the Study of Consciousness	**Room II- Imagination and memory** **[starts at 12:30, ends at 15:00]** **Oryan Zacks** - Imagination, memory and the ancient origins of the default mode network **Nesim Aslantatar** - Motivated Remembering: Religious Experience between Encounter and Retrieved Memory **Julia Wolf** - The Significance of Acting-As-If - Defending a Distinction between Pretence and Imagination **Jack Shardlow** - Pain Imagery: Individual Differences and Disutilitous Memories **Sacha Behrend** - Reference and Representational Formats in Episodic Memory	**Room III - Between percepts and concepts** **Don Oxtoby** - Inferentialism about Recognition **Matteo Colombo** - Ganjiers, Tolerance to Drugs, and the Puzzle of Drugs Aesthetic Expertise **Lucas Battich** - From perceptual to non-perceptual joint attention: A capacities-based account **Huadian Liu** - Intentionality and Presentational Qualities		

14:45 - 15:00	**Break**				
15:00 - 16:00	**Keynote Talk** **Devon Bailey (**University of Johannesburg) *The Perception of Dance: Considering Neurophenomenology*				
16:00-16:15	**Break**				
16:15 - 18: 15	**Room I - Symposium: New Directions in Teleosemantics** **Content Determination and the Explanatory Turn** **Sérgio Farias de Souza Filho -** Representing What Really Matters: An Informational Teleosemantic Solution to the Distality Problem **Esteban Withrington -** Frogs Recognize Prey: A Hybrid Teleosemantics **Johan Heemskerk** - Ultimate and Proximate Explanations and Teleosemantic Pluralism **Andrés Rubio Krohne -** Escaping Explanatory Circularity through Teleosemantics	**Room II - Symposium: The Neuroscience of Radical Embodiment** **Facchin Marco** - Brains are not cognitively impartial **Favela, Luis H. & Chemero, Anthony** - Direct Perception and Ecological Information Processing **Gambarotto Andrea** - Rethinking Biological Control: Heterarchy in Brain Networks **Raja Vicente** - On Radio Stations, Computers, and Radical Embodied Neuroscience	**Room II - Plural approaches to the mind sciences** **Tobias Sandoval** - Background conditions and emotional kinds **Maria Luiza Iennaco** - Toward a Multiscale Account of Attention: Neurophilosophy and Synthetic Philosophy Compared **Anton Sukhoverkhov** - Expanding Evolutionary Epistemology: Cognitive and Goal-Directed Biological Evolution **Xintong Wang** - From Fluency to Liking? Processing Experience, Affect, and Aesthetic Liking	**Room IV- models, minds, and models of minds** **[begins at 16; ends at 18:30]** **Gerda Mittag** - Want to understand computational explanation? - Ask a teacher! **Yizhuo Sun** - Beyond Static Representation: A Dynamic Mechanistic Account of Representational Vehicles in Predictive Processing **Johannes Brinz** - What are Neurocomputational Models? **Jannis Friedrich** - Brass-for-Brains: Analog Computation and Device Physics **Johan Largo** - Why language models are not cognitive extensions	**Room V- Imagined or perceived?** **Tiago Sestari** - Interactive Fear: Rethinking the Paradox of Fictional Emotion Through Games **Douglas C. Wadle** - Vividness in Mental Imagery Research and Beyond **Zhexi Zhang** - An internalist account of the effect of labels **Libni Teles** - Feature Recognition As A Mechanism For Representational Constancy
18:15 - 18:30	**Break**				
18:30 - 19: 30	**Keynote Talk** **Melina Gastelum Vargas** (Universidad Nacional Autónoma de México) *The architecture of being: time, environment, and identity in embodied cognition*				

	6 November				
9:00 - 10:00	**Keynote Talk** **Giovanna Colombetti** - University of Exeter *Feeling with things - towards a theory of material scafflonding*				
10:00 - 10:15	**Break**				
10:15 - 12:15	**Room I - The normativity of the mental** **Benedetta Cogo** - Keeping It Rational: Persons And Rationality In Philosophy Of Psychiatry **Caterina Scianna** - When Imagination Becomes Truth: Confabulation and Epistemic Vigilance **Anand Ekbote** - Non-veridical Perception and its Implications for Burgean Perceptual Entitlement **Farideh Sousani** - On the Ontology of the Self: Cognitive-Behavioral andJungian Approaches to the Symptom	**Room II - Philosophy of Mind** **Heng Ying** - Revisiting the Humean model of moral psychology **Shao-Pu Kang** - The Puzzle of Shared Consciousness **Gina Adriana Ramos Zamudio** - The Operative Prereflective Dimension as a Bridging Category: Toward a Dialogue with Cellular Memory **Giulia Lorenzi** - (A Variety of) Perceptual Abilities	**Room III - Subjectivity** **Manjari Chakrabarty** - The Possibility Of Consciousness-Brain Interaction Reconsidered **Shawn Prest** - Selfing without a self: The missing dimension of identification in computational accounts of selfhood **Wenyu YANG** - What Is It to Be a Conscious Subject: The Unity Assumption in the Subject-Summing Problem **Kira Miller** - An Eye for an 'I': Investigating the Relationship between Embodiment and Agency, and Exploring the Possibilities for Artificial Intelligence Models		
12:15 - 13:00	**Break**				
13:00 -15:00	**Room I- Self-Organization** **Hilde Teigen** - Rethinking self-organisation in neuroscience **Ye Yizhou** - Does Machine Learning Erode the Open Future? **Henrique Mendes** - Computationalism and enactivism: Tracing two antagonistic paradigms to their common cybernetic origins **Gabriel Moreira Francisco** - THIRD-WAVE EXTENDED MIND AND INTEGRATIVE PLURALISM	**Room II - Consciousness and selfhood** **[ends 15:30]** **Christian Lains** - Hypermodal Realism: Phenomenal Information and Excluded Possibilities **Marek Pokropski** - Idealizing Consciousness: Multiple Models or a Minimal Unifying Model? **Oleksandr Naumenko & Faisal Nars** - Do Categories Rely on Similarities or Differences? **Shahd Omar** - Can an Artificial Relationship Scaffold a Self? AI Companions and Quasi-Relational Selfhood **Antonio Lizzardi** - A Philosopher Watching Scientists Debate Consciousness: Toward a Metaphilosophical Mediation	**Room III - Minimal mentality** **Rongsheng Liang & Yizhuo Sun** - Abstraction Without Causal Loss: A Mechanistic Reconstruction of Minimal Models of Cognition **Stephanie Wai** - Comparing Minds: The Aggregation Problem for Multidimensional Frameworks **Juan C. Barrio-Aragón & José V. Hernández-Conde** - From Minimal to Temporal Consciousness: The origin of conscious experience beyond the present **Adrian Wieczorek** - Turning plants from head to ground. An alternative to the predictive stance in minimal cognition.	**Room IV - Symposium: Cognition beyond the body: affective scaffolding, embodied inference, and psychopathology** **Giulia Piredda -** Affective artifacts, aesthetics and care: a deepening view **Ben White** - Extended Rumination **Valeria Becattini & Axel Constant** - Where is the body in embodied active inference? **Julian Kiverstein** - Therapy chatbots as cognitive-affective scaffolds	

15:00 - 16:00	**Break**				
16:00 - 18:00	**Room I - Symposium: The Navigational Mind** **Monosree Chakraborty** - Negation as Navigation Failure: Toward a Cognitive Map Account of Propositional Negation **Andrea Hiott** - The Navigational Architecture of Mind understood through Operational Coherence **Wojciech Mamak** - Navigable Correspondence Networks: Neural Manifolds as Content-Bearing Structures **Gualtiero Piccinini** - The Movement of Thought: Navigation as Neurocognitive Architecture	**Room II - Symposium: The Metatheory of Psychopathology: The Problem of Psychosis In Phenomenology and Neuroscience** **Ximena González-Grandón** - Rethinking Neuropsychiatric Suffering: A Metatheoretical Approach to Interoception And Subjectivity. **Pablo López Silva** - Towards An Experimental Philosophy Of Psychiatry: Conceptual And Practical Reflections on a Qualitative Study on the Clinical Validity of the Concepts of Delusion. **Jesús Ramírez-Bermúdez** - A Metatheoretical Approach to Psychosis: Toward a Systemic Framework	**Room III - Mental states** **[ends 18:30]** **Rémi Tison** - Group agents as interpersonal systems: a dynamical theory of joint action **Christopher Stratman** - An Argument for Eliminativism About Occurrent Conscious Beliefs **João César Ramos** - Acquaintance, Knowledge and Normativity **Inchul Yum** - On Pleasure's Direction of Fit **Paola Dias Bauce** - Inner sense, or how we know of ourselves	**Room IV - Measures and concepts** **[Ends 18:30]** **Carlos Manoel Lopes Rodrigues** - Measuring the Unobservable: A Philosophical Analysis of Model-Based Inference in Psychological **Assessment** **Victor Angelucci** - A problem for the naturalization of mental files **Itamar I. Dreymann -** Can Concept-Empiricists account for the Mental-Representation of Questions? – A Proof of Concept **Andrés Rubio Krohne** - Dispositionalism and the success of folk psychology	**ROOM V- Self and consciousness** **Alba Marcela Zárate Rochín** - The mind as relational practice: a posthumanist feminist critique of cognitive individualism **Nathália de Ávila -** Remembering at the Edge of Consciousness: Affectivity and the Reconstitution of Selfhood in Near-Death Experiences **Keiran Bateman** - No Mental Atoms: Panpsychism's Category Mistake **Carolyn Wasula** - Relational Cosmopsychism: A Formal Account of Mind as Structured Participation
End of the conference
